

# ListenToMe

Effortless Voice-to-Text for Linux, Windows,  
macOS & Android.

# Simplicity Meets Power

ListenToMe is a streamlined dictation application created by a Czech author, utilizing AI technology from the Google Antigravity project.

**Current Version 1.4:** Now with improved phrase translation and minor bug fixes.

# Powered by Google STT

## Precision

Fast and accurate transcription using Google's Speech-to-Text engine.

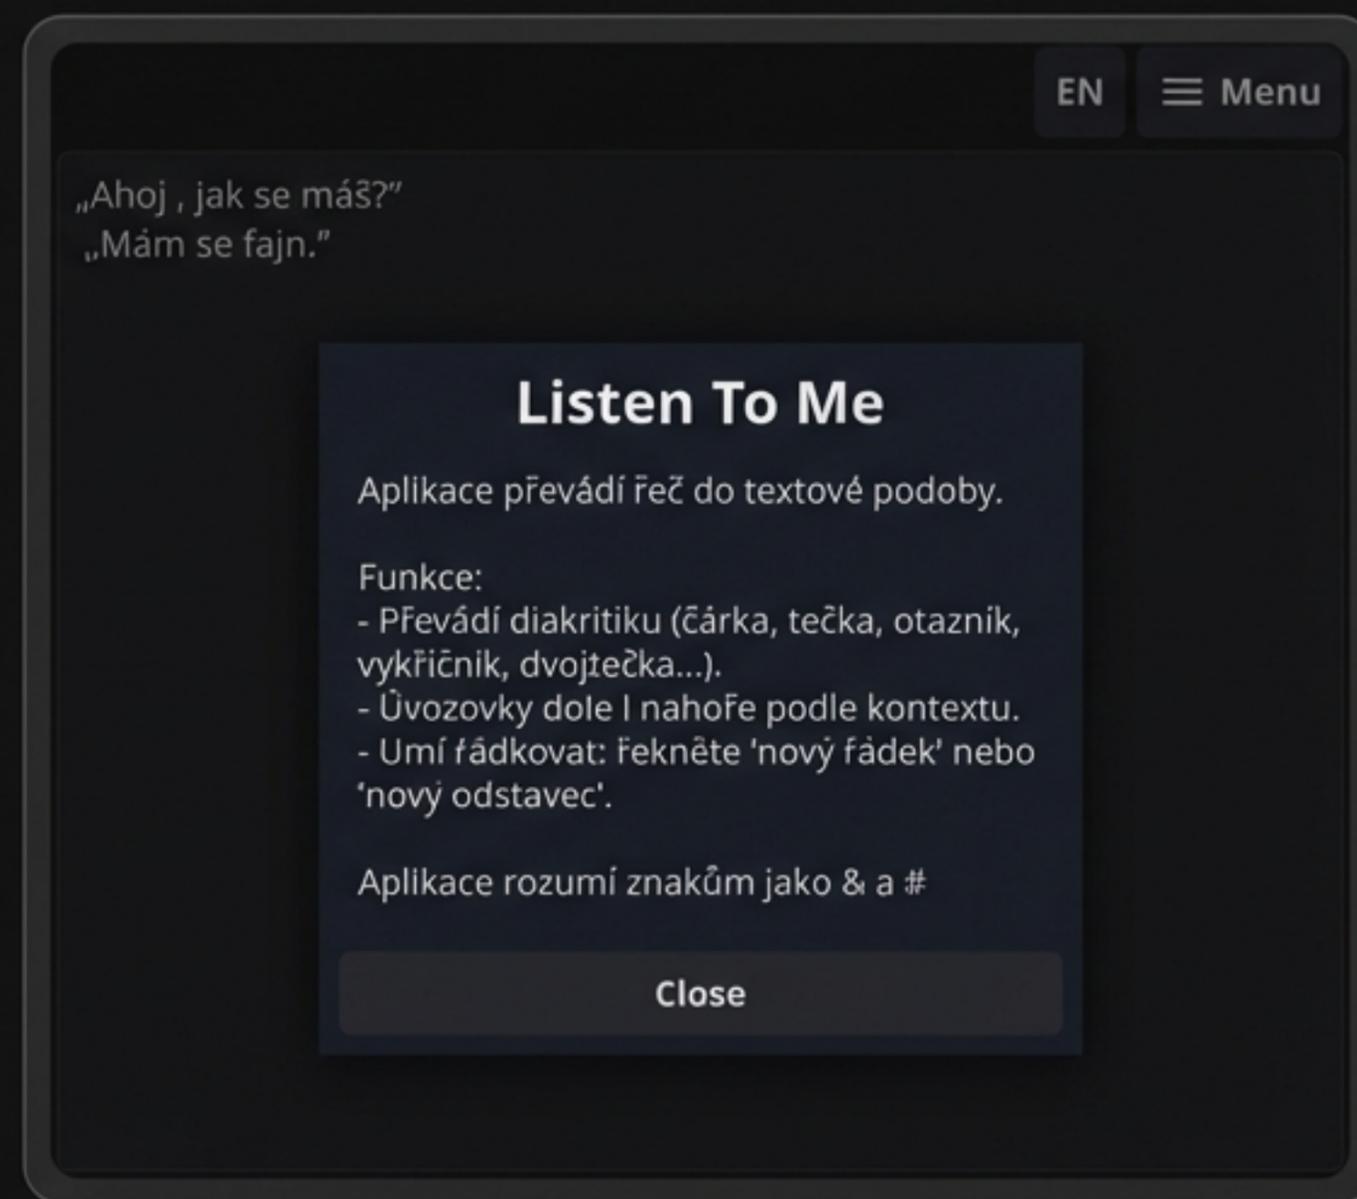

## Efficiency

No heavy local models required—the cloud handles the processing for maximum efficiency.

# Instant Bilingual Support

Fully localized for both English and Czech. Switch languages instantly with a single click in the UI.

Handles complex diacritics and local character sets automatically.

# Control Formatting with Your Voice

ListenToMe understands punctuation, spacing, and special characters.

New line -> ¶

Comma -> ,

Period -> .

Smart quotes -> “ ”

/

Special Chars -> &#

# Zero Learning Curve

1. **Choose** your language
2. Press the **Listen** button
3. Speak naturally
4. Press **Stop** when finished

# Native Support Across Ecosystems

Run it anywhere. Consistent experience on desktop and mobile.

Linux

Windows
